PROFESSIONAL SUMMARY

Technology entrepreneur and executive combining software engineering, cybersecurity, business development and strategic leadership. Co-Founder & CEO of DCSecurite Advanced Technology since July 2024, building commercial software products, coordinating technical teams, developing enterprise solutions and translating complex business requirements into technology-driven outcomes. Open to international opportunities and relocation, particularly software engineering, technical project coordination, and technology and cybersecurity consulting roles.

PROFESSIONAL EXPERIENCE

DCSecurite Advanced Technology July 2024 – Present
Co-Founder & Chief Executive Officer Oran, Algeria

- Founded and built a technology company specializing in software engineering, enterprise management solutions, digital products, advanced cybersecurity audits and vulnerability hunting.
- Lead the company's strategy and management team across the Executive, IT & Cybersecurity and Marketing departments.
- Grew adoption to **192+ paying companies** and **2,700+ software users** across Algeria (including free software users).
- Oversee product development, guide key technical decisions, and manage multiple concurrent projects and their budgets.
- Delivered multiple commercial products: **Moussir 26** (launched, revenue-generating; Windows, macOS, Android), **Moussir BTP** (launched; management software for construction companies) and **La Baraque POS** (custom-developed management program for a fast-food restaurant chain, 2024–2025).
- Direct cybersecurity engagements end to end: security strategy, scoping, assessment frameworks, penetration testing, vulnerability assessment, quality assurance, reporting and remediation guidance.
- Estimated cumulative business turnover of **100,000+ USD** (2024–2026; original currency DZD).

SELECTED ENGAGEMENTS

Logistics & Delivery Company Application Security Assessment & Hardening

- Assessed application access controls, authentication and exposure of sensitive business data; documented vulnerabilities.
- Delivered remediation recommendations and established a monthly security assessment framework for continuous monitoring.

Restaurant Franchise (6 locations, Algeria) Business Software & Digital Transformation

- Designed, developed and deployed a centralized management system with a scalable architecture for high-volume order processing.
- Digitalized workflows from order taking to kitchen preparation and service; improved data reliability and order tracking.
